## **1. Description Of The Project**

Our project is mainly focusing on travelers all around the world. With beaches as our main selling point, we expect to attract the attention of travelers who love beaches. We'll provide daily updates on popular and trending spots around the globe. By being a subscriber, the user will get notifications upon the latest update on the web. Firstly, the user has to log in into the web. By logging in users will have access to almost every feature of our web, from top spots to the number of tours available. We also provide overall fees from the tour and descriptions of the designated destination.

## **2. Problem Analysis**

With today's day and age, social media is getting more and more famous which will eventually lead to bigger exposure, attracting customers is made easier online and it can also influence people who are not in the certain area. Without this kind of exposure, smaller competitors will have no fighting chance against the one who already made it big. Thus, this is why this web is created. We would also recommend underrated beaches which have low exposure and we think are worthy enough to spread words of the beach. This can also help with beaches which are getting overpopulated. With overpopulation comes pollution, polluted water will harm the biodiversity and disease from polluted water is common. We would like to reduce the number of casualties from water pollution by recommending clean beaches. With that being said, we would not hesitate to help small and unpopular beaches and prioritize only the big and popular beaches, every beach will be treated the same with no exception, such as quality control and the same amount of exposure received from our web.

## **3. Inspired Related Work**

Our work has been greatly influenced by Golden Rama Tours & Travel, which is both a travel advice and a tour booking website. Everything on our website is crafted similarly to Golden Rama Tours & Travel's website and is somewhat improved like the sample shown below. We have improved the overall aspects taken from Golden Rama by taking the aspects lacked by Golden Rama and improving it to another level. The website's general design, including the font we use and its overall feel, is coded similarly to Golden Rama's website.

A screenshot of a travel website homepage. The background is a scenic sunset over a tropical island. The top navigation bar includes 'Travel' (with a sub-link 'Discover your place'), 'Home' (which is underlined), 'About', 'Discover', 'Places', and 'Login'. On the left, there's a large white text overlay that reads 'Explore The Best Beautiful Beaches' with a 'Explore' button below it. On the right, there's a live chat window with a profile picture of 'Jonathan Doe' (online). The chat history shows a message from the user asking about a destination for Bali, and a response from the website operator. There are also social media icons for Facebook, Instagram, and Twitter at the bottom left. At the bottom, there are links for 'More Information' and 'About The Best Beaches'.

Customer Service

## 6. Implementation

### - What's working and What's not

We expect each and every button or features of our app to work well. Most of the features are working, although there is some that is not working how it is intended to work.

Experiments	Expected outcome	Actual outcome	Was it as expected? Y/N
<b>Night mode button</b>	Everything in the page that is white will turn black	Nothing happened	<b>N</b>
<b>Social media button</b>	It will link directly towards our socials	It directs us to the social platform	<b>Y</b>
<b>More info button</b>	Show more information about the place where it host the more info button	Show more information about the place where it host the more info button	<b>Y</b>

## 7. Summary

With the exponential and rapid growth of technology, advertising is also made easier. Achieving fame can vary from way to way, our project takes advantage of this fact and helps others achieve fame by the means of recommendations. Trusts are gained once customers are satisfied by our recommendation.
